

Name: _____

Dividing by 6, 7, 8 and 9

- Scatter the division cards face down on a table.
Each player, in turn:
 - chooses two cards to turn face up
 - answers the division on each card
 - if the answers are the same, keeps the pair of cards;
 - if the answers are different, replaces the cards face down

The player with more pairs at the end wins.

$18 \div 6 = \square$

$72 \div 9 = \square$

$70 \div 7 = \square$

$8 \div 8 = \square$

$54 \div 6 = \square$

$0 \div 7 = \square$

Share 16 equally among 8.

90 divided by 9
