Just2easy

Create • Share • Learn

Many thanks

for choosing the Award winning tools from
Just2easy

The easiest way to create share and learn
on the web. Proven award winning ICT
tools for teaching and learning 2012, 2013...
So, now what do you want to do?

#Jointhewebrevolution

Expand **Digital Literacy:**

Just2easy creates a digital learning environment, where teachers and pupils learn and use technology in an easy to use interface which produces assessable multi-modal results across the curriculum. Educating pupils about their role as an author in a digital world

Promote Independent **Problem Solving:**

Just2easy creates an adaptable and innovative learning environment for all learners, regardless of age or learning style. Students are encouraged to be independent and to write with real purpose and audience.

Celebrating work:

Just2easy gives pupils safe opportunities to publish their work through multiple channels either via the school blog, their own portfolio, class sites or else where on the web

Create **Differentiated Learning** Activities:

Just2easy's fluid and differentiated interface promotes a positive balance between the mastery of concepts and skills, the imaginative use of multi-media and relevant Internet resources.

BLAST

off!!!

#yourcloud

#yourcloud

You now have access to your school's own cloud space. You have a file store, web and file distribution site, desktop publishing tools, ICT cross curriculum tools, stop frame animation, voting, multi site blogging platform and a publishing platform available to everyone at home and at school. Over the coming pages we will show you how to add and manage users, change your webby site and get you and your school started with our tools.

So, now what do you want to do?

What do I NEED first?

- **Make sure that your computers are up-to-date.**

You will need: The latest version of Java

Flash

Internet Explorer 8+

or Google Chrome

or Firefox

If you have ipads then please download the j2e APP

<https://itunes.apple.com/gb/app/j2e/id364611886?mt=8+>

j2Webby, j2Bloggy, j2e5, j2Vote and j2Launch are all tablet ready

If you login to www.j2launch.com with your user details

Then click on this link:

<http://www.j2e.com/desktopInstall/installer.php>

This will install our new desktop icon. Once installed it will take you to your launch site.

Please feel free to put this icon on as many computers as you would like, as it does speed up access to our award winning tool suite.

To add a class, click on 'ADD'

#Designedfor schools

#Designedfor schools

search

add delete manage users...

	class name	users	role	delete
<input type="checkbox"/>		6	rename	
<input type="checkbox"/>	1	26	rename	
<input type="checkbox"/>	4	0	rename	
<input type="checkbox"/>	blue table	0	rename	
<input type="checkbox"/>	class1	1	rename	
<input type="checkbox"/>	eco club	0	rename	
<input type="checkbox"/>	new1	2	rename	
<input type="checkbox"/>	null	7	rename	
<input type="checkbox"/>	orchard	0	rename	
<input type="checkbox"/>	winter	4	rename	

add delete manage users...

This will add the class and then you add a pupil to a class.

Adding classes means you can share documents and launch buttons quicker and easier.

Why not manage classes?

Advanced
Tip

This enables teachers to create specific learning groups and allows you to share documents, Just2easy files and launch buttons.

In manage users you can search for a user, and re-assign class or reset their password.

Launch in

Adding a Button

In this case we are going to add an activity from the BBC Bitesize website as a link on launch.

add button

name: bbc bitesize

URL: <http://www.bbc.co.uk/bitesize/ks1/>

thumbnail: drop picture here

tip: this is the bbc bitesize

info: Go onto literacy to find balloon joining words

tags: homework

in library:

age: 4-7 7-11 11-14 14-16 16 plus

add

This will take you to the add a button screen where you can add the name of the URL of where you want the button to take you.

This is what appears when you hover over the button: Some Info: When you click on the 'i' on the right top corner of the button.

Tags: are really important as they help create dynamic folders. If you tag it as homework, then every time homework is typed into search it will appear as part of the homework group.

Advanced
Tip

3...2...1

**This has added the button to your launch.
New buttons appear at the top next to my files.
Now when you click on the button this will take
you to the BBC Bitesize website.**

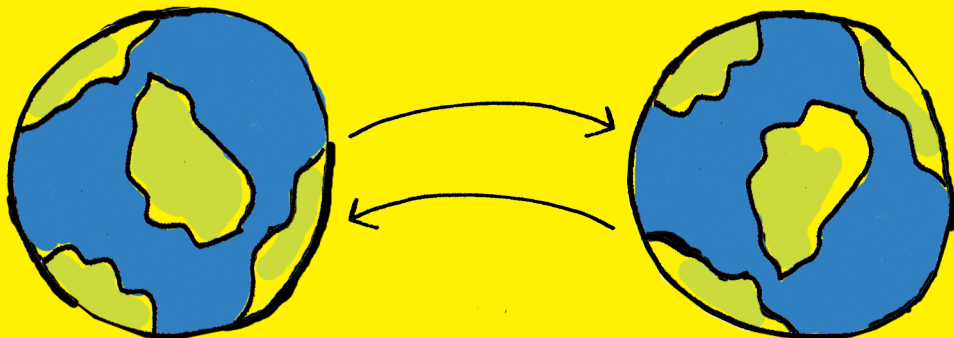

**Advanced
Tip**

You can also create a button of a j2e page, so you could create a file for homework on j2e and add this as a button to your launch by using the URL of the j2e document.

#cleverttechnologymadeeasy

Share the
WEB and
your own
RESOURCES

#personalisedlearning
#personalisedlearning

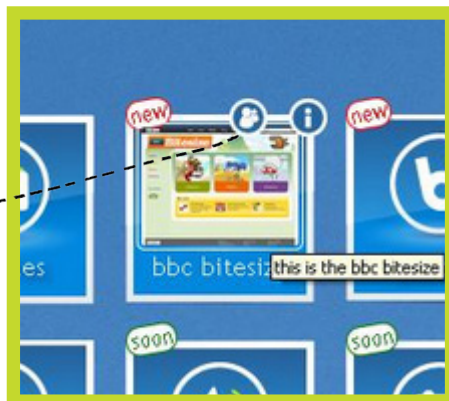

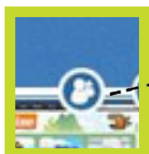

Teachers can share a button from their launch to anyone else's launch in your school.

To do this, when you hover over the button you can click on the sharing button.

When you click on this you can share the button.

#Learningcollections
#Learningcollections

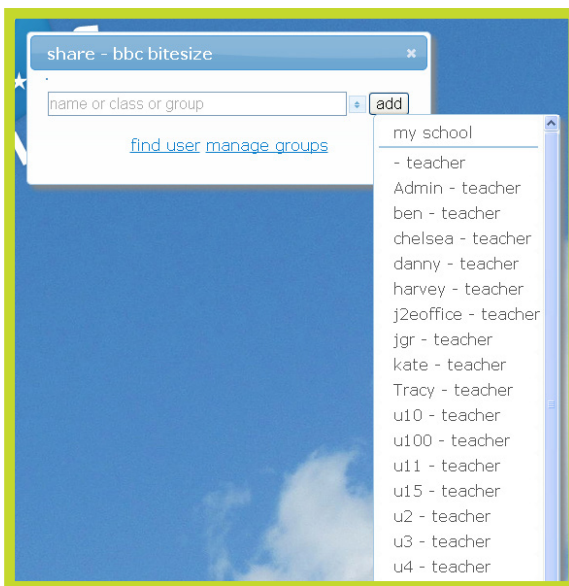

If you click on the arrow button this will let you add users to share the button with.

When you scroll down, you can even share to a whole class or group.

When you share, the button will appear on their launch, with the "new" symbol.

Easily share your web resources and any files that you have created to support your pupils learning. Save your Interactive whiteboard files as PDF's, add your Powerpoint files or even use padlet as a forum. Tag them with the same tag and share with your class. Learning collections made easy.

Just Launch at HOME AND SCHOOL from any device

Basic tools for j2e5

Creating a document and publishing it to j2Webby couldn't be easier!

- **Add a picture**
- **Add some text by clicking and typing**
- **Add a shape and change the colour**

This is a document created with j2e5 using embed and forms.

We are now going to publish this to the j2Webby site.

Click on Publish along the top toolbar.

Teachers can publish the document as a new page or as a blog post.

publish

http://www.j2e.com/support1/Admin/ideawall

name ideawall

new page blog main menu

publish

Publishing as a blog means that the document comes up a thumbnail, and you have to click to view the post.

You can comment on work that has been published as a blog.

#parentalengagement
#parentalengagement

Create and
Publish

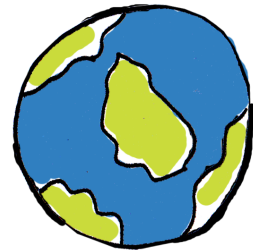

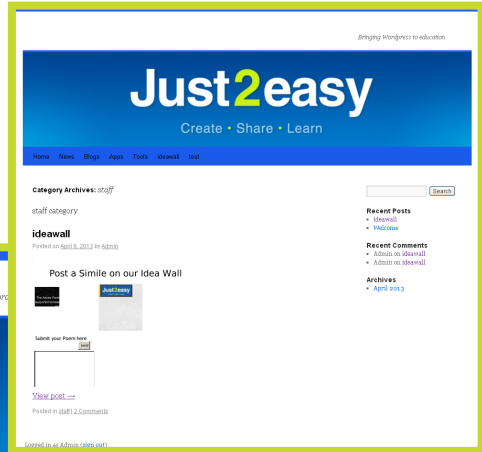

You can also publish as a page, this comes up as a full page and you do not have to click to view it.

A page also comes up in the black menu bar.

Pupils can only create blog posts and all work is moderated.

Changing your webby school name...

Changing your school name in j2e and j2Webby is easy and enables you to create a bespoke url for your school's j2Webby site.

Log in as the Administrator and open a new j2e java page and go to "admin" in the top left corner. Go to my settings and click on the school tab.

Change the account alias to reflect the new name.

You have now successfully created an additional url for your school's J2Webby platform.

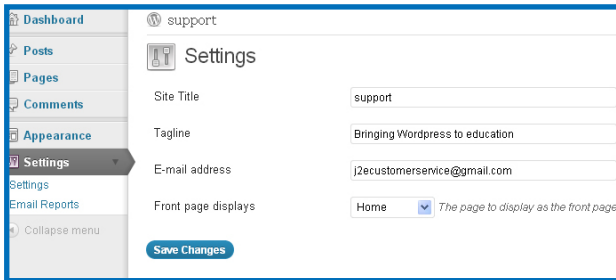

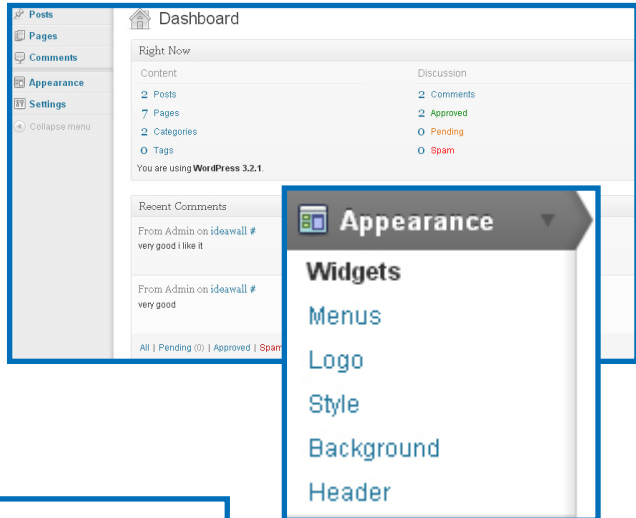

The screenshot shows a web browser window titled "j2e my settings: support1/Admin". The browser's address bar and tabs are visible. The main content area has a navigation menu with tabs: "my account", "my defaults", "my dictionary", "file cache", "school", "classes", "users", and "superusers". The "school" tab is active. Below the tabs, there is a "renew or upgrade" link. The form contains several input fields with labels: "authority", "account" (with the value "support1"), "account alias", "organisation" (with the value "support"), "address", "post code" (with the value "123"), "contact name" (with the value "customer support"), "email" (with the value "j2ecustomerservice@gmail.com"), and "phone" (with the value "123").

Changing your webby header...

Go into your j2Webby site

**Go to tools and dashboard
On the left hand side,
Appearance is where you
can change your webby to
reflect your school.**

**Click on appearance and
onto header, where you can
change the header that is
displayed at the top of the
page.**

**To change your home page,
you need to publish your
completed home page and
then select the page from the
drop down menu
in settings.**

In the dashboard you can also change other things...

**In Widgets you can manage the
widgets that are used in your j2Webby.**

**In Menus you can change and edit how
your menus are lay out, you can also
manage how your drop down boxes
in your toolbar are laid out.**

**In Logo, you can change
your school's logo.**

**You can click style, which will enable you
to change your colour of menu's and text.**

**The background can change the
background of your webby, you can
change this to match your
schools colours.**

The

#writingrevolution

for your school

- **Motivate and encourage writing by publishing pupils' writing and reach for external audiences**
- **Blog owners and pupils using social networking sites have been reported to be significantly better writers compared to pupils who don't use blogs or social networking sites**

(Clark and Dugdal 2009)

- **Blogging is an effective strategy to raising boys' performance**
- **Effective use of visual media and ICT facilities creates an engaged community of writers encouraging collaborative writing**

Source: DFE Research Report DFE-RR238
What is the research evidence on writing?

The first significant study of young people attitudes to writing in the UK, our report finds that young people who engage with technology based texts enjoy writing more than young people who don't (57% vs. 40%, respectively).

Source: Dr Christina Clark (PhD), Head of Research, National Literacy Trust

j2e is not just a single piece of software but more like a parcel that you keep on unwrapping to reveal more. The ease of j2e becomes apparent from the first time you use it and pupils find it simple yet intuitive. I have used j2e on a very basic level as a means of adding text and pictures with ease, right up to a more complex level of website design, questionnaires, blogging and stop frame animation. Since releasing j2Webby this has meant that all files pupils create, whether it be a stop frame animation, webpages, pictures or a simple piece of work, can now simply be published to one space where their class teacher can moderate and publish into a safe and usable area. (Perfect for school websites.)

Matt Warne, Malvern Wells Primary

The possibilities are endless!: Children designing the school website, parent questionnaires online, home-school communication, homework, individual/group projects... j2e is very simple, yet a very powerful learning tool.

Ben Williams, St Marks CE Junior School

Within the first few weeks of our trial period with j2Webby we had a new school site up and running, children blogging and parents leaving comments. Just2easy has made my life in ICT 100 times easier and provides an excellent standard of service to our school.

Jess Roberson, Perranporth Primary School
