

### **Service Level Agreement:**

The offer: 3 days per school  
Termly co-ordinator meetings  
Regular updates via email and newsletter.

The Cost:  
£1200

If 3 or more schools purchase as a group, each school will be entitled to one twilight CPD session in addition to the 3 days. (Twilights are normally charged at £195).

Schools purchasing as a group decide their time allocation collaboratively. A possible model is that schools keep 1.5 days per school and allocate the remaining 1.5 to joint CPD activities. However, the precise allocation of time will be decided by the group.

Schools may opt to use their time allocation for such things as: in-class support, lead lessons, curriculum planning, mobile learning implementation, and consultation or Governing Body briefings.

There will also be a termly co-ordinators' meeting.

The course programme will be a range of half day/twilight courses to further the schools' eLearning capability whether this is focussing on staff CPD requirements or developing some of your pupils to become Digital Leaders.

### **Discount Purchasing.**

I have negotiated with some companies to provide their products at a discount for SLA subscribers.

J2E. The full J2E [Primary Tool Suite](#) can be purchased for £399. (rrp £449)

Rising Stars: 20% discount on any product from their [computing range](#).

[ICT4C](#): Significant discounts can be arranged for their services, such as Secure eMail and eSafety audits.

10% off [Point2Protect's](#) eSafety product.

Any future negotiated discounts will be circulated to subscribing schools.

**Possible Topics for staff CPD and/or In class support include:**

- Computing: Addressing the new requirements
- Animation
- Film Making and Editing
- Assessing Computing. What to do in a 'Life Without Levels'
- Programming and Coding
- Cloud Computing- The Free and Paid for Options
- Control Technologies from FS to KS2
- Photography
- Getting More From Your Learning Platform
- Why blog?..... and how to
- Planning for the new ICT Curriculum
- Getting the most from Tablets and Apps
- Improving writing through the use of technology
- Creating your own apps

An over-arching aim of each course is to develop a 'Cluster Champion' in that area to build capacity within the group.

As well as this suggested list, courses and events may be developed and arranged in the light of new national announcements, software and hardware developments.

Regards,

**Paul Wright**
