

# Outdoor learning—Review

Dosbarth Bedwen—14 July 2023

It was the final Forest Friday of the school year today.  
We had a very good tidy up!

We went litter picking. There were lots of tissues and plastic wrappers. We talked about what may happen to the animals if they ate the plastic.

We cut the strings for all the items we have made this year and hung from the trees. We thought about how the branches grow every year so we need to give them room. We also cut down our water bottle bird feeders. The squirrels have been busy finding ways to get into the feeders. We were fascinated to see the different openings they had made.

We used secateurs to dead head the flowers. We hope that they grow new flower heads which may be blooming when we return to school in September.

Mrs Daffin donated a pumpkin plant. We dug a big hole, watered and planted the pumpkin. Fingers crossed it grows as big as last year!

Thank you to everyone who has donated plants, soil and other items, watered plants or given their time to help us improve our outdoor area this year. It really is appreciated!
