

# Illuminated Decorations

Collen Christmas DT challenge—Dec 22

We have been learning about symmetry in maths and investigating electrical circuits in science. We were challenged to plan and make a Christmas tree decoration using these skills.

We experimented with different shaped trees and decided that using a triangle was easier to keep symmetrical.

We worked together as some of the wiring was quite fiddly.

Our designs were decorated using shapes coloured in felt pens ...

but then we found the coloured gems!

We think they look fabulous.
