

# Outdoor learning—Spring Planting

## Dosbarth Bedwen—12 May 2023

Today we have been very busy planting our new flower bed. Before we could plant, we needed to weed. We picked the weeds out of the soil and looked to see who had the largest weed pile.

We divided the area into four sections, one for flowers, one for herbs, one for vegetables and the fourth we are going to turn into a mud play area.

We planted the plants that Ysgawen sowed before Easter and a few larger plants.

Dylan brought in some cornflowers he had grown at home. They will make the bed look nice and colourful!

Boys and Boden of Welshpool kindly donated two dumpy bags of soil for our project.

We filled buckets with the soil and transported the buckets to our forest school area using the trikes.

We thought about all the plants and animals we can see at this time of year in our local area, then we used these ideas to decorate the shelter.

We had fun collecting the mown grass.

We built quite a mountain from it.
