

Outdoor learning—World Bee Day

Dosbarth Bedwen—19 May 2023

Tomorrow is World Bee Day! To celebrate these amazing pollinators, we have been finding out how they navigate and communicate with each other by doing a waggle dance.

We created our own class waggle dance and practiced it together.

We discovered how bees do a waggle dance. This shows the direction and distance from the hive to the food source.

We drew our own waggle dance maps on the floor. All the classes enjoyed doing our waggle dances during playtime!

We tried honey on a digestive biscuit. The honey was made by bees from Miss Dixon's Mum's hive. Delicious .

We learned that bees could not see the colour red, but loved the colours purple and blue.

We planted lots of colourful flowers in our raised bed, hoping to give them lots of food sources.

We continued moving the soil from the ton bag to fill the gaps around the play-ground. We still have more to do.

We are improving our resilience, perseverance and stamina!

We learned a story to help us tie knots. The rabbit goes round the tree, through the hole and runs away (pull).

This helped us attach wings to pinecones to make our bees.

Year 1 and 2 taught each other how to tie the knots using the story.

Save our bees! Plant these

A queen bee will lay 800,000
eggs in her lifetime!

Save Our Bee

We need bees. without bees we
would not have fruit and veg.

Save our Bees!

Save our bee's! Plant these

Bees ^{did you know} make Honey they
don't eat it.
