

# Outdoor learning—Pumpkins

Dosbarth Bedwen—21 October 2022

In the Summer term, we planted a pumpkin. Today was the day we harvested it. It was very heavy

We looked very carefully at the colours of the pumpkin. We learned the name of the parts of a pumpkin:

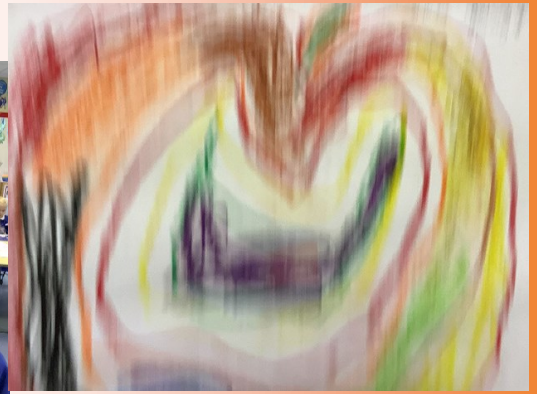

the skin, pulp, seeds and stalk.

We learned about the life cycle of a pumpkin.

The pumpkin had many colours and textures. We tried to show this through our art.

We tasted pumpkin soup and caramelised pumpkin seeds.

The pumpkin seeds were the most popular.

We had a go at pumpkin carving.

We collected the pumpkin seeds, ready to dry and plant next summer.

Finally, we tidied up all the mess!
