

Winter walk

We went on a walk to see if we could spot any signs of the season Winter. We had to look very carefully.

We spotted lots of holly leaves but we could not see any berries.

We observed that on the trees there are buds that are starting to sprout. We are going to observe the tree regularly to see the buds growing even more.

We saw lots of molehills all over our grass! We tried to count them. There were a lot to count!

We spotted a slug that had been munching on one of the leaves. We talked about what other minibeasts could also have munched including a caterpillar.

We only spotted one nest and it was a big nest at the top of one of the trees.
