

Outdoor Learning—Dosbarth Collen—Oct 23

Rocks & Soils

As part of our 'Rocks' topic, we went looking for signs of igneous, sedimentary and metamorphic rock in our area.

We thought about how each rock was being used and which other rocks could be used for that job.

We had a tidy up ready for winter. We learned how to use secateurs and gave the bush a trim.

We collected leaves and put them in the compost bin.

Hopefully, it will make leaf mould to place on the flower beds in Spring.
