

# Outdoor learning—TREES

Dosbarth Ysgawen—Dec 2022

We designed and made our own Christmas decorations using tree slices, acrylic paint and colouring pens. The tree slices were small, so we had to think carefully about the details we used in our design.

We looked at patterns in nature for inspiration.

We investigated different methods to measure the height of a tall tree. The best method was looking through our legs. The least accurate method was using a pencil. We had to work together to measure the tree.
