

# Robot Wars—Build, Program, Battle

**BUILD:** Ysgawen took part in a robotics workshop. Working in teams they designed and built a robot to take part in Robot Wars. It needed a sensor, motors and wheels to be mobile and a rotating weapon arm.

**PROGRAM:** Each team needed to program their robot to find and attack the other team's robot.

**BATTLE:** Let battle commence... and plenty of repairs!

Thanks to Wojtek  
At PrepareRobo Ltd.

We had a fabulous  
morning.
