

Task 3

On J2Launch select the J2Code tile

Then select the 'Logo' tile to launch the logo app.

On the window that opens you will see a small spaceship in the middle of a white rectangle.

On the window that opens you will see a small spaceship in the middle of a white rectangle.

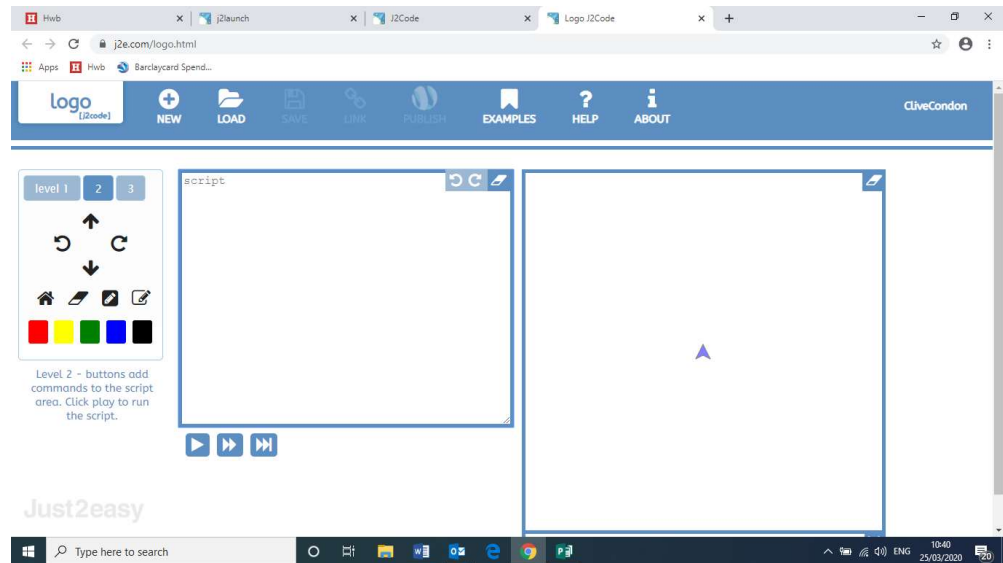

To the left of the spaceship there are the controls – the controls are like the controls of the Beebot.

Above the controls there are 3 blue buttons level 1 2 and 3.

Select level 2 and the screen will change

You now have three windows on screen

On the left the controls for the spaceship, in the middle a window that says the word script and in the third window on the right hand side you will see the small spaceship in the middle of a white rectangle.

If you click on the controls in the first window you will notice that some letters and numbers appear in the middle window but nothing happens to the spaceship.

1. Click on each of the controls in the control window.
2. Under the script (middle) window there is a play button  Click on that and watch the spaceship move
3. Find out what the other buttons do
4. And remember if you want to clear any of the screens just simply click on the rubber icon 

Once you've got used to the controls;

Draw a square on the screen

Then rotate the spaceship 90 degrees choose a different colour and draw another square.

Do this twice more, remember to rotate 90 degrees and choose a different colour each time.

Save your work in your file

Now do the same thing but this time with a rectangle.
